

Pfeiffer Vacuum

Nashua, NH
24,000 SF

Vantage Builders completed the renovation of an entire, 24,000-SF building for Pfeiffer Vacuum, one of the worlds leading providers of high-tech vacuum solutions for the semiconductor, industrial, coating, analytical and R&D markets. Located on the site of Pfeiffers North American headquarters in Nashua, NH, the building is being used as a Service Center of Excellence (SCE), which brings together under one roof all service activities for the major part of the companys product portfolio. Vantage installed all new MEP (mechanical, electrical, plumbing) systems and the HVAC work included make-up air units, massive exhaust fans and a polypropylene ductwork system. A new compressed air system with two high-pressure compressors was installed. The warehouse area features interior bridge cranes to move the equipment and new, high-speed roll-up doors. Epoxy flooring provides a durable surface throughout the industrial areas of the building. The office area features DIRTT (Do It Right This Time) glass doors and walls. Vantage also completed significant exterior work, including new windows and a storefront. An improved EIFS (exterior insulation and finish system) and metal panel facades were also introduced.
